

### Investment Approach

The Short Term Bond Fund seeks to preserve capital and current income by investing in a diversified portfolio that focuses primarily on Canadian fixed-income securities. The Fund holds debt instruments issued or guaranteed by governments and corporations in Canada and abroad, including mortgage-backed securities, asset-backed securities and other collateralized debt securities. The Fund offers exposure to a diversified portfolio of bonds, investing primarily in investment grade bonds ("BBB" rated and above).

#### Risk rating

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the fund's returns, see the "What is a Mutual Fund and What Are the Risks of Investing in a Mutual Fund?" section of the fund's simplified prospectus.

### Growth of \$25,000 Since Inception<sup>1</sup>

The rate of return or mathematical table shown is used only to illustrate the effects of the compound growth rate and is not intended to reflect future values or returns on investment in the investment fund or asset allocation service.

### Performance

Cumulative Returns (%)				Annualized Returns (%)						Calendar Year Returns (%)				
1 MO	3 MO	6 MO	YTD	1 YR	3 YR	5 YR	10 YR	SINCE INCEPT	INCEPTION DATE	2025	2024	2023	2022	2021
0.1	-0.2	0.4	0.3	2.9	4.9	2.5	2.6	3.3	27 Mar 2006	4.2	6.7	6.0	-3.8	-0.8

#### Fund Details

FundSERV Code	PCA051
Inception Date	27 Mar 2006
Total Net Assets	\$230.8 million
Distribution Frequency	Monthly; capital gains (if any), December

#### Managers and Mandates

Managers and Mandates	Allocation
Aviva Investors Canada (Canadian Short-Term Bond)	100%

#### Fund Characteristics

Number of holdings	62
Current Yield	3.8%
Duration (in yrs)	2.6
Average Rating	A1
Standard Deviation (3 yr)	2.1%

Current yield is a bond's annual coupon interest divided by the bond's current market price. Calculated at the portfolio level, this metric uses notional subtotaling where each security's weight is represented as the security's notional market value divided by the portfolio's total market value.

Average Rating is the weighted average of the Moody's rating of each security in the portfolio, rolled up to the portfolio level.

Standard Deviation of performance is a measure of historical volatility risk.
