

U.S. High Yield Bond Fund

Class O(H) – 30 Apr 2025

SEI New ways.
New answers.®

Investment Approach

The U.S. High Yield Bond Fund seeks to provide a high level of total return by investing primarily in high yield fixed income securities issued primarily by U.S. corporations. The Fund invests primarily in a diversified portfolio of non-investment grade rated debt instruments and high yield securities with a credit rating below BBB. The Fund's average weighted maturity may vary but will not exceed ten years. The Fund utilizes a manager-of-managers investment strategy that combines multiple specialist Portfolio Managers.

Class O(H) units will have a return that is based on the performance of the Fund's portfolio investments because the foreign currency exposure of this portion of the Fund is hedged using derivative instruments such as foreign currency forward or futures contracts.

Risk rating

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the fund's returns, see the "What is a Mutual Fund and What Are the Risks of Investing in a Mutual Fund?" section of the fund's simplified prospectus.

Fund Details

FundSERV Code	PCA8055
Inception Date	5 Mar 2010
Total Net Assets	\$663.5 million
Distribution Frequency	Monthly; capital gains (if any), December

Managers and Mandates

	Allocation
Brigade Capital Management (High Yield)	33%
Ares Capital Management II (High Yield)	19%
Benefit Street Partners (High Yield)	19%
T. Rowe Price Associates (High Yield)	15%
J.P. Morgan Investment Management (High Yield)	13%

Fund Characteristics

Number of holdings	1,166
Current Yield	7.2%
Duration (in yrs)	2.8
Average Rating	B1
Standard Deviation (3 yr)	7.1%

Current yield is a bond's annual coupon interest divided by the bond's current market price. Calculated at the portfolio level, this metric uses notional subtotalling where each security's weight is represented as the security's notional market value divided by the portfolio's total market value.

Average Rating is the weighted average of the Moody's rating of each security in the portfolio, rolled up to the portfolio level.

Standard Deviation of performance is a measure of historical volatility risk.

Growth of \$25,000 Since Inception¹
