

### Investment Approach

The Balanced 60/40 Fund seeks to provide long-term growth of capital and income primarily through investment in a diversified portfolio of equity and fixed income securities with a slight bias to equity. The Fund generally has a mix of 40% fixed income securities and 60% equity securities. The Fund invests in a selection of underlying funds which utilize a manager-of-managers investment strategy and combine multiple specialist Portfolio Managers, each of whom is responsible for managing a portion of the portfolio in accordance with a specific mandate.

### Fund Characteristics

Number of Underlying Fund Subadvisors	38
Number of Underlying Fund Holdings	4,277
Standard Deviation (3 yr)	9.7%
Standard Deviation of performance is a measure of historical volatility risk.	

### Risk rating

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the fund's returns, see the "What is a Mutual Fund and What Are the Risks of Investing in a Mutual Fund?" section of the fund's simplified prospectus.
