

Investment Approach

The Canadian Fixed Income Fund seeks to provide broad participation in the Canadian bond market and to achieve a return that exceeds the FTSE TMX Canada Universe Bond Index. The Fund primarily holds debt instruments issued or guaranteed by the federal, provincial and municipal governments of Canada or foreign governments and Canadian or foreign corporations, including mortgage backed securities, asset backed securities and commercial paper. The Fund utilizes a manager-of-managers investment strategy and combines multiple specialist Portfolio Managers, each of whom is responsible for managing a portion of the Fund in accordance with a specific mandate.

Risk rating

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the fund's returns, see the "What is a Mutual Fund and What Are the Risks of Investing in a Mutual Fund?" section of the fund's simplified prospectus.

Growth of \$25,000 Since Inception¹

The rate of return or mathematical table shown is used only to illustrate the effects of the compound growth rate and is not intended to reflect future values or returns on investment in the investment fund or asset allocation service.

Fund Characteristics

Number of holdings	699
Current Yield	3.6%
Duration (in yrs)	7.2
Average Rating	Aa3
Standard Deviation (3 yr)	7.2%

Current yield is a bond's annual coupon interest divided by the bond's current market price. Calculated at the portfolio level, this metric uses notional subtotaling where each security's weight is represented as the security's notional market value divided by the portfolio's total market value.

Average Rating is the weighted average of the Moody's rating of each security in the portfolio, rolled up to the portfolio level.

Standard Deviation of performance is a measure of historical volatility risk.
