

Investment Approach

The U.S. High Yield Bond Fund seeks to provide a high level of total return by investing primarily in high yield fixed income securities issued primarily by U.S. corporations. The Fund invests primarily in a diversified portfolio of non-investment grade rated debt instruments and high yield securities with a credit rating below BBB. The Fund's average weighted maturity may vary but will not exceed ten years. The Fund utilizes a manager-of-managers investment strategy that combines multiple specialist Portfolio Managers, each of whom is responsible for managing a portion of the Fund in accordance with a specific mandate.

Risk rating

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the fund's returns, see the "What is a Mutual Fund and What Are the Risks of Investing in a Mutual Fund?" section of the fund's simplified prospectus.

Growth of \$25,000 Since Inception¹

The rate of return or mathematical table shown is used only to illustrate the effects of the compound growth rate and is not intended to reflect future values or returns on investment in the investment fund or asset allocation service.

Fund Characteristics

Number of holdings	1,130
Current Yield	7.4%
Duration (in yrs)	2.8
Average Rating	B1
Standard Deviation (3 yr)	5.7%

Current yield is a bond's annual coupon interest divided by the bond's current market price. Calculated at the portfolio level, this metric uses notional subtotaling where each security's weight is represented as the security's notional market value divided by the portfolio's total market value.

Average Rating is the weighted average of the Moody's rating of each security in the portfolio, rolled up to the portfolio level.

Standard Deviation of performance is a measure of historical volatility risk.
